JASON ANG

CYBERSECURITY | SYSTEMS ENGINEERING | SECURITY ANALYTICS

Singapore | +65 9107 7923 | jasonanqq@gmail.com | LinkedIn | Portfolio

PROFILE

Cybersecurity diploma student with hands-on FortiGate firewall, network administration and incident response experience. Developed a Python/SQLite SIEM and email threat analysis project; seeking a technology internship combining security engineering, programming and infrastructure.

TECHNICAL SKILLS

Security & Networking: Fortinet FortiGate, security policies, NAT, VLANs, IPsec / SSL VPNs, endpoint hardening, threat investigation.
Systems: Windows Server, Active Directory, DNS, MX / SPF / DKIM / DMARC, DHCP, Hyper-V, NAS access controls, Microsoft 365.
Development & Data: Python, SQLite / SQL, JavaScript, HTML / CSS, REST APIs, syslog processing, detection rules, full-text indexing.

PROFESSIONAL EXPERIENCE

SYSLOGIC PTE LTD | Systems Engineer

Sep 2023 - Feb 2025

Internship and part-time contract periods: Sep 2023-Apr 2024; Apr-Jul 2024; Dec 2024-Feb 2025

- Configured FortiGate firewalls, security policies, NAT, VLANs and IPsec / SSL VPNs; resolved network access issues.
- Designed and configured an organisation's NAS folder structure and role-based permissions; set up domain DNS and MX, SPF, DKIM and DMARC records.
- Assisted in containing a ransomware incident by isolating the compromised endpoint; investigated suspicious email headers for client support.
- Configured static-WAN-IP routers and supported IMAP / Lotus Notes-to-Outlook mailbox migrations.

SVIT PTE LTD | Part-Time Systems Engineer

Jun 2025 - Apr 2026

Contract periods: Jun-Jul 2025; Aug-Oct 2025; Dec 2025-Jan 2026; Mar-Apr 2026

- Set up and maintained firewall controls, VPN connectivity and secure network access for client environments.
- Created Windows deployment images with Sysprep; supported NAS and encrypted-data migrations and checked file accessibility.
- Configured client DNS records for mail delivery and sender authentication, including MX, SPF, DKIM and DMARC.

SELECTED PROJECTS

Sentinel Desk - SIEM & Email Threat Analysis | Python, SQLite, JavaScript | Project details
Built a local SIEM with log collection, indexed event search, correlation alerts and interactive dashboards; added email-header analysis with explainable indicators for spoofing, phishing and sextortion.

CommonGround - Timetable Comparison App | Live demo / GitHub
Developed timetable comparisons, shared free-time discovery and saved schedules/groups using web technologies and Supabase.

Corsa Tyres Website | Live website
Designed and manage a business website, maintaining page layouts and site content.

EDUCATION

Nanyang Polytechnic - Diploma in Cybersecurity & Digital Forensics (in progress) | Apr 2025 - May 2028 (expected)
Institute of Technical Education - Higher Nitec in Cyber & Network Security | Jan 2022 - Nov 2024
